**COUNTY OF SAN LUIS OBISPO
DEPARTMENT OF PLANNING AND BUILDING
STAFF REPORT**

SUBDIVISION REVIEW BOARD

MEETING DATE October 3, 2005	CONTACT/PHONE Nick Forester 781-1163	APPLICANT Donald Carnine	FILE NO. CO 05-0090 SUB2004-00348
SUBJECT Request by Donald Carnine for a Tentative Parcel Map using the Transfer of Development Credits program to subdivide an existing 40 acre parcel into two parcels of 20 acres each. The proposed project is within the Agriculture land use category and is located at 4242 Las Tablas-Willow Creek road, approximately 3.5 miles west of the community of Templeton. The site is in the Adelaida planning area.			
RECOMMENDED ACTION Deny Tentative Parcel Map CO 05-0090 based on the findings listed in Exhibit A.			
ENVIRONMENTAL DETERMINATION This project is found to be statutorily exempt from the California Environmental Quality Act under the provisions of Public Resources Code section 21080(b)(5), which provides that CEQA does not apply to projects which a public agency rejects or disapproves.			
LAND USE CATEGORY Agriculture	COMBINING DESIGNATION None	ASSESSOR PARCEL NUMBER 039-071-021	SUPERVISOR DISTRICT(S) 1
PLANNING AREA STANDARDS: None applicable to this project			
LAND USE ORDINANCE STANDARDS: L.U.O. section 22.24, Transfer of Development Credits			
EXISTING USES: Two single family residences			
SURROUNDING LAND USE CATEGORIES AND USES: <div style="display: flex; justify-content: space-between;"><div><i>North:</i> Agriculture/ residences <i>South:</i> Agriculture / residences</div><div><i>East:</i> Rural Lands / residences <i>West:</i> Agriculture / residences</div></div>			
ADDITIONAL INFORMATION MAY BE OBTAINED BY CONTACTING THE DEPARTMENT OF PLANNING & BUILDING AT: COUNTY GOVERNMENT CENTER ♦ SAN LUIS OBISPO ♦ CALIFORNIA 93408 ♦ (805) 781-5600 ♦ FAX: (805) 781-1242			

OTHER AGENCY / ADVISORY GROUP INVOLVEMENT: The project was referred to: Public Works, Environmental Health, Ag Commissioner, County Parks, CDF, Cal Trans, RWQCB, APCD, Templeton Community Advisory Group and the City of Paso Robles.	
TOPOGRAPHY: Gently sloping	VEGETATION: Walnut trees and oaks
PROPOSED SERVICES: Water supply: Individual well Sewage Disposal: Individual septic system Fire Protection: CDF	ACCEPTANCE DATE: July 6, 2005

ORDINANCE COMPLIANCE:

Minimum Parcel Size

The property is zoned Agriculture. The westerly portion of the property (approximately 10 acres) is being used for dry farmed walnut orchard. No other agriculture was observed occurring on the site. The minimum parcel size allowed by Section 22.22.040 of the Land Use Ordinance for Dry Farm Orchards is 40 acres, and thus the property does not qualify for subdivision using the use test in the Agriculture land use category.

The property has 1.8 acres of class II soils. Minimum parcel size for class II soils based on the land capability test is 20 acres. The property has 13.71 acres of class IV soils. Minimum parcel size for class IV soils based on the land capability test is 40 acres. The property has 24.68 acres of class VI soils. Minimum parcel size for class VI soils based on the land capability test is 320 acres. The Land Use Ordinance requires that where a site contains more than one soils classification, each new parcel shall satisfy the minimum parcel size for the qualifying soils type. Because the subject property cannot satisfy the minimum parcel size for any of the soils types that are present, the property does not qualify for subdivision using the land capability test in the Agriculture land use category.

The applicant is requesting a subdivision of the 40 acre parcel that would result in two parcels of 20 acres each based on the provisions of the county Transfer of Development Credit Program(TDC).

TDC Receiver Site

Land Use Ordinance Section 22.24.070 provides for division of sites which do not otherwise qualify for division through use of the Transfer Development Credit (TDC) program. This program allows density to be transferred from an already established "sending site" to a "receiver site". The Transfer Development Credit (TDC) program provides for the creation of one additional parcel on properties which cannot otherwise qualify for a subdivision, including properties within the Agriculture land use category, if the property meets all the other criteria to be designated a receiver site.

To qualify as a receiver site under Section 22.24.070 of the Land Use Ordinance, the site must meet the following criteria:

- (1) The project is recommended for a mitigated negative declaration.
- (2) The site is not within agricultural preserve.
- (3) The site is within 10 miles of an urban reserve line.
- (4) The footprint of the area proposed for development is located on less than 30 percent slopes.

- (5) The footprint of the area proposed for development is outside of Sensitive Resource Area(SRA), Flood Hazard(FH), Geologic Study Area(GSA), Earthquake Fault Zone and the Very High Fire Hazard Area.
- (6) The footprint of the area proposed for development is outside of a Significant Biological, Geographical or Riparian Habitat as defined by the Natural Areas Plan (appendix B of the Ag and Open Space Element of the general plan).
- (7) the development complies with all development standards, water, sewage disposal and access standards and all land division standards as set forth in Titles 19, 21, and 22.

Proposed Parcel 2 has a Flood Hazard designation covering the eastern portion of the parcel. The access driveway on proposed parcel two is located within the mapped Flood Hazard zone. Access driveways are included within the definition of development as used in the TDC ordinance. Because the project proposes to use the TDC ordinance to create a parcel with development within the mapped Flood Hazard Zone, the application is inconsistent with Section 22.24.070.A.5 of the TDC ordinance and staff is unable to make the findings necessary to recommend approval of the project to the review authority.

Ag and Open Space Element Policy 4 encourages the use of small parcels in Agricultural land use category for establishment of small scale agricultural uses. The purpose of this policy is to encourage agricultural uses on existing small agriculturally zoned parcels and discourage rural residences as the principle use. At 20 acres each, the proposed parcels would not appear to be of adequate size to establish a viable agricultural use. Therefore, the only use that could be established would be residential as the primary use of the site. This directly conflicts with Ag and Open Space Element Policy 4.

Agriculture Policy 15-Transfer of Development Credits, and Framework for Planning policies state that the purpose of the TDC program is to:

- Protect both land with agricultural capability and the business of agriculture itself.
- Help protect agricultural resources by guiding development to more suitable areas.
- Direct growth and development away from agricultural areas, thereby reducing potential conflicts with agricultural activities.

The proposed project would not protect agricultural resources. As proposed, it would:

- Divide a property with some agricultural potential into two properties each with inadequate resources to sustain a long-term agricultural operation.
- Fail to meet the objectives of the TDC program, which is to “relocate development from land with agricultural capability.

As mentioned above, the proposed subdivision is inconsistent with Section 22.24.070.A.5 of the TDC ordinance and the intent of the TDC ordinance.

Framework for Planning, General Goal 8 states that land uses should “Maintain a distinction between urban and rural development by providing for rural uses outside of urban and village areas which are predominantly agriculture, low intensity recreation, residential and open space uses which will preserve and enhance the pattern of identifiable communities.” The property is located in a transition area with smaller parcels to the south and larger parcels to the north. Subdivision of the parcel will create a precedent that could lead to a pattern of future subdivision

of the larger agricultural parcels to the north which will erode the distinction between urban and rural areas and would be clearly inconsistent with Framework for Planning, General Goal 8.

Framework for Planning, General Goal 10 states that land uses should "Encourage the protection of agricultural land for the production of food, fiber, and other agricultural commodities. At 20 acres each, the proposed parcels would not appear to be of adequate size to establish a viable agricultural use and the proposed parcel map is inconsistent with Framework for Planning, General Goal 10.

PLANNING AREA STANDARDS:

None applicable to the project.

COMBINING DESIGNATIONS:

Flood Hazard

COMMUNITY ADVISORY GROUP REVIEW:

The Templeton Area Advisory Group reviewed the project at its August 18, 2005 meeting.

A motion was made to not support the project. The motion was adopted with a vote of six in favor and one abstention.

TAAG does not support the use of a TDC to subdivide land in the Agriculture land use category for the following reasons:

1. TAAG endorsed the Agricultural Commissioner's recommendation to remove agricultural land from eligibility as TDC receiver sites. (TAAG to Board of Supervisors dated July 16, 2004).
2. In addition TAAG affirmed the same position in a letter to the Board of Supervisors dated May 20, 2005. In this letter TAAG endorsed recommendations about revising the TDC program prepared by the Planning Commission on May 12, to the Board of Supervisors. Planning Commission recommendation #7 states, "Consider not allowing lands within the Agriculture land use category to be used as receiver sites."

AGENCY REVIEW:

Public Works –Stock conditions

Environmental Health – Well documentation required for each lot prior to recordation.

County Parks - Pay Quimby fees.

City of Paso Robles – No comments received.

CDF – issued a Fire Safety letter dated May 31, 2005

RWQCB- No comments received.

Cal Trans- No comments received

APCD- No comments

Agricultural Department-Potential impacts to agriculture. See attached referral.

LEGAL LOT STATUS:

The one lot was legally created by a recorded parcel map.

FINDINGS - EXHIBIT A

Environmental Determination

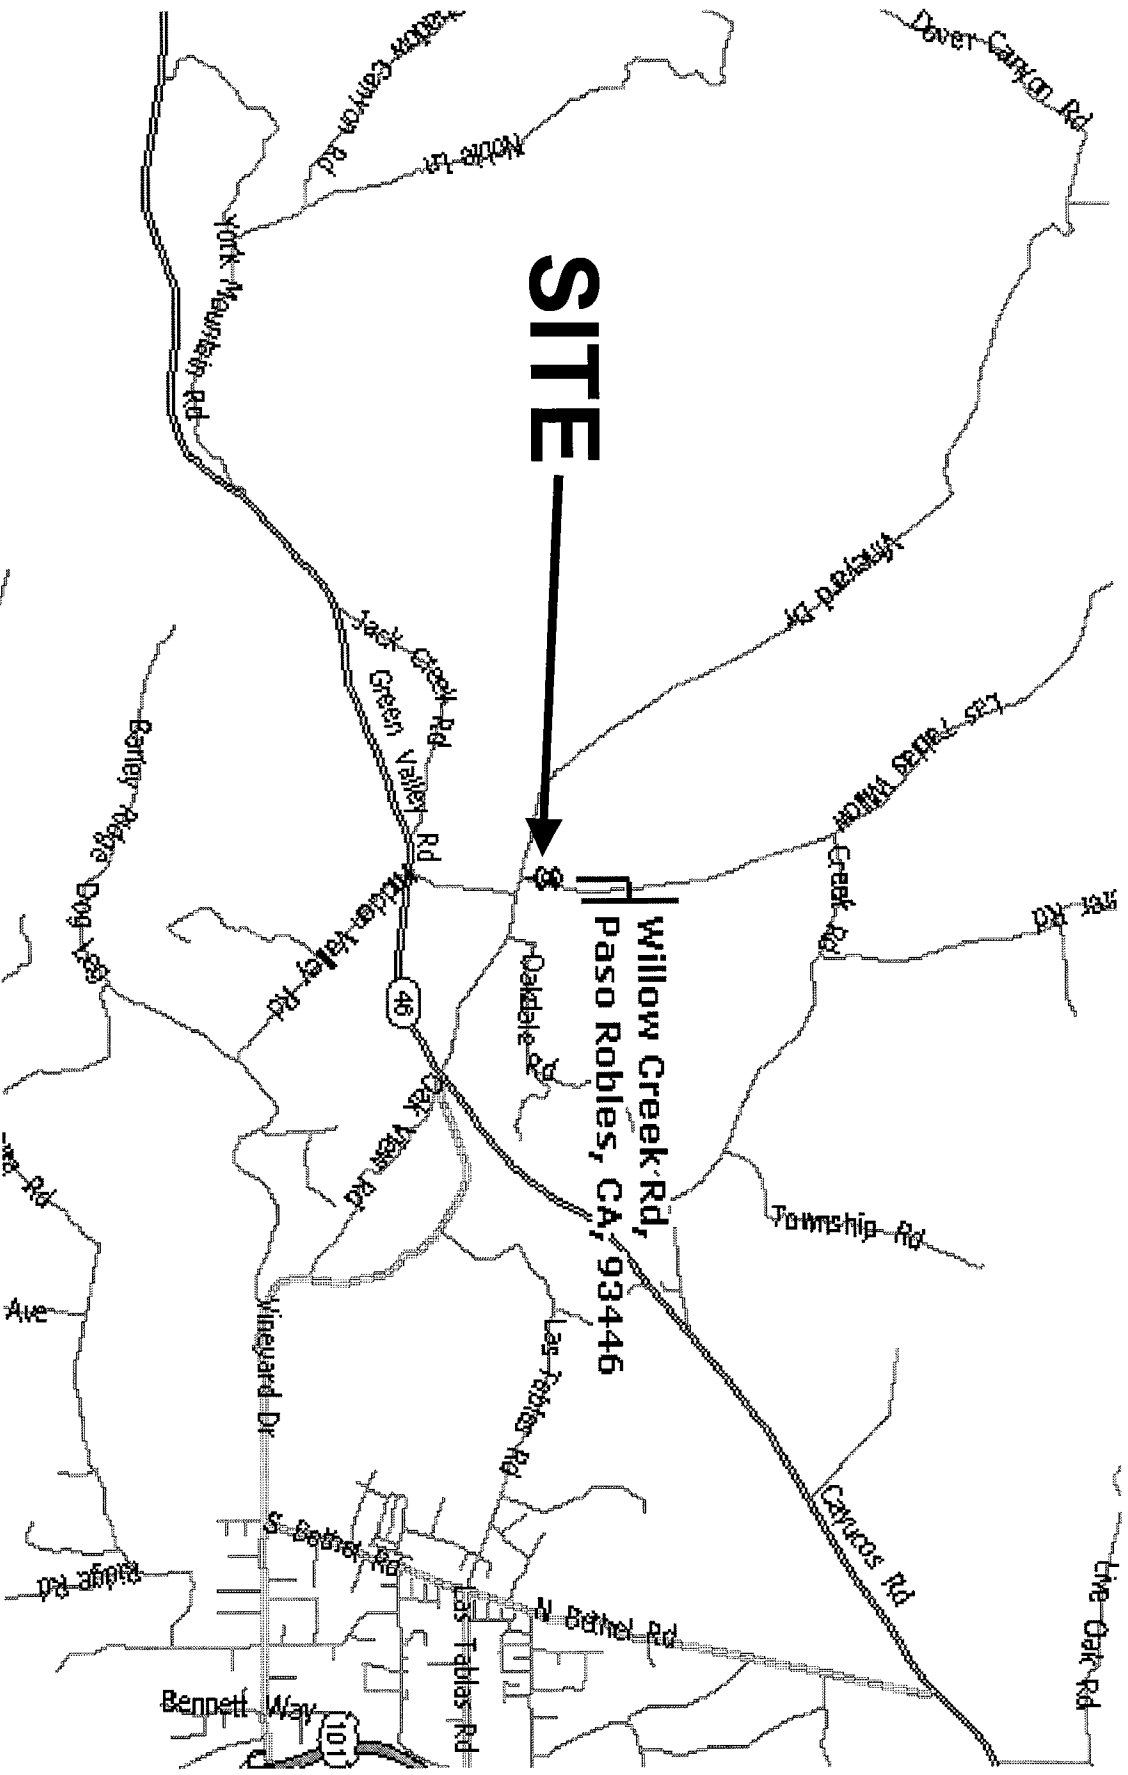

- A. This project is found to be statutorily exempt from the California Environmental Quality Act under the provisions of Public Resources Code section 21080(b)(5), which provides that CEQA does not apply to projects which a public agency rejects or disapproves.

Tentative Map

- B. The proposed map is inconsistent with applicable county general and specific plans because it does not comply with Ag and Open Space Policy 4 (small lot agriculture), as the project would create parcels that would only support rural residences and would not be large enough for viable agricultural uses.
- C. The proposed map is inconsistent with applicable county general and specific plans because it does not comply with General Goal 8 of Framework for Planning (distinction between urban and rural development) because this subdivision would erode the rural area between Paso Robles the large rural parcels to the north and west of the project site.
- D. The proposed map is inconsistent with applicable county general and specific plans because General Goal 10 of Framework for Planning (protection of agriculture land) because it would not protect agriculturally zoned land for the purposes of the production of food, fiber and other agricultural commodities consistent with the Agriculture land use category.
- E. The proposed map is not consistent with the county zoning and subdivision ordinances because the parcel does not meet the criteria to be a receiving site. Section 22.24.070.A.5 of the TDC ordinance requires that : The footprint of the area proposed for development is outside of Sensitive Resource Area(SRA), Flood Hazard(FH), Geologic Study Area(GSA), Earthquake Fault Zone and the Very High Fire Hazard Area. The access driveway and on proposed parcel two is located within the mapped Flood Hazard zone. Access driveways are included within the definition of development as used in the TDC ordinance. Because the project proposes to use the TDC ordinance to create a parcel with development within the mapped Flood Hazard Zone, the application is inconsistent with Section 22.24.070.A.5 of the TDC ordinance.
- F. The proposed parcels are smaller than the majority of surrounding agricultural parcels to the north, making the proposed parcels inconsistent with the pattern of development of the area.

Subject: SUBDIVISION USING TDC; CO05-0090; Don and Shirley Carnine
4242 Las Tablas-Willow Creek Road, APN 036-071-021

Dear Mr. Forester:

At its August 18th meeting, TAAG reviewed the subject project.

In a vote of 6 in favor and 1 abstention, TAAG does not support the use of a TDC to subdivide land in the agricultural land use category for the following reasons:

1. TAAG endorsed the Agricultural Commissioner's recommendation to remove Agricultural land from eligibility as TDC receiver sites. (TAAG to Board of Supervisors dated July 16, 2004).
2. In addition, TAAG affirmed the same position in a letter to the Board of Supervisors dated May 20, 2005.
In this letter TAAG endorsed recommendations about revising the TDC Program prepared by the Planning Commission on May 12th to the Board of Supervisors. Planning Commission recommendation #7 states, "Consider not allowing lands within the Agricultural land use category to be used as receiver sites."

Truly yours,

Dorothy Jennings

FROM: Michael Isensee, Agriculture Department *MD*

SUBJECT: Carnine TDC Parcel Map SUB2004-00348 (1039)

Summary of Findings

The Agriculture Department's review finds that the proposal to use a Transfer of Development Credit (TDC) to subdivide a 40-acre project site into two parcels of twenty acres each within the Agricultural land use category would result in **potential significant impacts** to agricultural resources and/or operations because each proposed parcel would not have adequate resources to ensure sustainable long-term agricultural production. Additionally, the creation of substandard parcels in agricultural areas typically results in the development of non-agricultural uses that create additional incompatibilities with nearby agricultural operations.

The comments and recommendations in our report are based on policies in the San Luis Obispo County Agriculture and Open Space Element, the Land Use Ordinance, the California Environmental Quality Act (CEQA), and on current departmental policy to conserve agricultural resources and to provide for public health, safety and welfare while mitigating negative impacts of development to agriculture.

A. Project Description and Agricultural Setting

The applicant is requesting to use a TDC to subdivide a 40-acre project site into two parcels of twenty acres each within the Agricultural land use category. The project site is located north of Las Tablas-Willow Creek Road and west of Niderer Road, approximately four and one-half miles west of Paso Robles.

The project site is developed with two residences, an accessory barn, and approximately 10 acres of a dry farmed walnut orchard (this includes some portions of the orchard that appear to extend beyond the applicant's parcel boundary). The site consists of approximately 11.8 acres of Class II soils (nonirrigated) and 30 acres Class VI soils. If irrigated, only approximately 1 acre of the site's soil would qualify as Class II soil, while other soil classifications would not change. These agricultural resources do not meet the minimum requirements for standard subdivision, which would require a minimum of 40 acres of dry farmed orchard or 320 acres of a grazing use per proposed parcel. Such standards were established to protect agricultural resources for long-term agricultural uses. Surrounding properties are within the Agriculture land use category and support wine grape vineyards, dry farm orchards, dry farmed grain and grazing uses.

B. Evaluation of Potential Impacts

Agriculture and Open Space Element and Land Use Ordinance

The proposed parcel map does not qualify for subdivision according to the standard tests for minimum parcel size in the Agriculture and Open space Element AGP21: Minimum Parcel Size Criteria for the Division of Agricultural Lands, and the Land Use Ordinance. The TDC program provides for the creation of one additional parcel on properties that cannot otherwise qualify for a subdivision, including properties within the Agriculture land use category, if the property meets all the other criteria to be designated a receiver site. The Agriculture Department is concerned about the use of agricultural lands as TDC receiving sites.

Agriculture Policy 15 – Transfer of Development Credits, and Framework for Planning policies state that the purpose of the TDC Program is to:

- Protect both land with agricultural capability and the business of agriculture itself.
- Help protect agricultural resources by guiding development to more suitable areas.
- Direct growth and development away from agricultural areas, thereby reducing potential conflicts with agricultural activities.

The proposed project would not protect agricultural resources. As proposed, it would:

- divide a property with some agricultural potential into two properties each with inadequate resources to sustain a long-term agricultural operation;

- create additional substandard agricultural parcels in a rural and agricultural setting. Substandard parcels are among those most likely to convert to nonagricultural use and to create additional incompatibilities with existing nearby agricultural operations;
- allow for an additional guest house or granny unit on each proposed parcel;
- establish a precedent for dividing any agricultural property with two residences merely to accommodate the current owners; and
- fail to meet any of the objectives of the transfer of development credits program (LUO 22.24.010A), which is to “relocate development from environmentally sensitive land, land with agricultural capability, or antiquated subdivisions to more suitable areas.

Impacts to On-Site Agricultural Capability

The existing parcel consists of approximately ten acres of dry farmed walnut orchard, and approximately 12 acres of Class IV soils and 30 acres of Class VI soils. The proposed division of these resources would result in potential significant impacts to agricultural resources because each proposed parcel would not have adequate resources to ensure sustainable long-term agricultural production. Additionally, the proposed subdivision would allow for additional development that could result in the conversion of soils, which would further impact agricultural capability. The existing parcel configuration is superior in terms of agricultural capability.

Impacts to Adjacent Agricultural Lands

Adjacent and nearby parcels have similar soils. The proposed subdivision utilizing the TDC program may lead to additional similar division proposals and conversion of these productive soils into substandard parcels. Additionally, creation of substandard parcels, as proposed, often results in conversion of the land to non-agricultural uses, creating additional incompatibilities with existing nearby agricultural operations.

If I can be of further assistance, please call 781-5753.

CDF/San Luis Obispo County Fire Department

North County Team
County of San Luis Obispo
Department of Planning and Building
County Government Center
San Luis Obispo, CA 93408

Subject: Parcel Map Project # SUB2004-00348

Dear North County Team,

I have reviewed the referral for the parcel map plans for the proposed two parcel subdivision project located at 4242 Las Tablas-Willow Creek Road, Paso Robles, CA. This project is located approximately 10 to 15 minutes from the closest CDF/San Luis Obispo County Fire Station. The project is located in State Responsibility Area for wildland fires.

It is designated a High Fire Severity Zone. This project is required to comply with all fire safety rules and regulations including the California Fire Code, the Public Resources Code and any standards referenced therein.

The following conditions will apply to this project:

Access Road

An access road must be constructed to CDF/County Fire standards when it serves more than one parcel; access to any industrial or commercial occupancy, or vehicular access to a single parcel with more than two buildings or four or more dwelling units.

- The maximum length of a dead end road, including all dead-end roads accessed from that dead-end road, shall not exceed the following cumulative lengths, regardless of the number of parcels served:

○ Parcels less than 1 acres	800 feet
○ Parcels 1 acre to 4.99 acres	1320 feet
○ Parcels 5 acres to 19.99 acres	2640 feet
○ Parcels 20 acres or larger	5280 feet
- The road must be 18 feet in width and an all weather surface.
- If the road exceeds 12% it must have a non-skid paved surface.

- Roads may not exceed 16% without special mitigation and shall not exceed 20%.
- All roads must be able to support a 20 ton fire engine.
- Road must be named and addressed including existing buildings.
- A turnaround must be provided if the road exceeds 150 feet.
- Vertical clearance of 13'6" is required.

Driveway

A driveway is permitted when it serves no more than two buildings, with no more than 3 dwelling units or a single parcel, and any number of accessory buildings.

- Driveway width for high and very high fire severity zones:
 - 0-49 feet, 10 feet is required
 - 50-199 feet, 12 feet is required
 - Greater than 200 feet, 16 feet is required
- Turnarounds must be provided if driveway exceeds 300 feet.

Water Supply

The following applies:

☐ This project will require a community water system which meets the minimum requirements of the Appendix III-A & III-B of the California Fire Code.

☒ A water storage tank with a capacity determined by a factor of the cubic footage of the structure will be required to serve each existing and proposed structure. A residential fire connection must be located within 50 to 150 feet of the buildings.

Fuel Modification

- Vegetation must be cleared 10 feet on each side of the driveways and access road.
- Maintain around all structures a 30 foot firebreak. This does not include fire resistive landscaping.
- Remove any part of a tree that is within 10 feet of a chimney.
- Maintain any tree adjacent to or overhanging any building free of deadwood.
- Maintain the roof of any structure free of leaves, needles or other flammable material.

If I can provide additional information or assistance, please call 543-4244.

Sincerely,

Chad T. Zrelak
Fire Captain Inspector

EXHIBIT B

8-20
CONDITIONS OF APPROVAL FOR CO 05-0090, CARNINE/EMK

Approved Project

This approval authorizes the division of a _____ acre parcel into _____ parcels of _____ **acres / square feet** each.

Access and Improvements

- ☐ Roads and/or streets to be constructed to the following standards:
- a. _____ constructed to a _____ section within a _____ foot dedicated right-of-way.
 - b. _____ widened to complete a _____ section fronting the property.
 - c. _____ constructed to a _____ section from the property to _____ (minimum paved width to be _____ feet).
- ☐ The applicant offer for dedication to the public by certificate on the map or by separate document:
- a. For future road improvement _____ feet along _____ to be described as _____ feet from the recorded centerline.
 - b. For future road improvement _____ feet along _____ to be described as _____.
 - c. For road widening purposes _____ feet along _____, to be described as _____ feet from the recorded centerline.
 - d. The _____ foot road easement as shown on the tentative parcel map with a _____ foot radius property line return at the intersection of _____.
 - e. A _____ foot radius property line return at the intersection of _____.
 - f. The _____ foot road easement terminating in a county cul-de-sac as shown on the tentative map.

Drainage

8-21

- ☐ _____ is not capable of carrying additional runoff. Construct off-site drainage facilities for an adequate outlet, or provide evidence of adequate drainage easements.
- ☐ The existing drainage swale(s) to be contained in drainage easement(s) dedicated on the map.
- ☐ Submit complete drainage calculations to the Department of Public Works for review and approval.
- ☐ If calculations so indicate, drainage must be **retained/detained** in a drainage basin on the property. The design of the basin to be approved by the Department of Public Works, in accordance with county standards.
- ☐ If a drainage basin is required, the drainage basin along with rights of ingress and egress be:
 - a. granted to the public in fee free of any encumbrance.
 - b. offered for dedication to the public by certificate on the map with an additional easement reserved in favor of the owners and assigns.
 - c. reserved as a drainage easement in favor of the owners and assigns.
- ☐ If a drainage basin is required, a zone of benefit be formed within _____ for maintenance of the drainage basin. Application to be filed with the The Department of Public Works Administrator.
- ☐ If a drainage basin is required, this development be annexed to _____ for maintenance of the drainage basin. Evidence of acceptance to be filed with the Department of Public Works.
- ☐ The project shall comply with the requirements of the National Pollutant Discharge Elimination System Phase I and/or Phase II storm water program. *Provide WQID # to County*

Wastewater Disposal

- ☐ Prior to the filing of the final parcel or tract map, the applicant shall submit to and be jointly approved by the county Department of Planning and Building and Health Department, results of percolation tests and the log or logs of soil borings performed by a registered civil engineer. For this purpose, the applicant shall perform one or more soil borings to be a minimum depth of ten (10) feet in the area of the appropriate area of the proposed sewage disposal system to determine the: a) subsurface soil conditions, (example: impermeable strata which act as barriers to the effective percolation of sewage); b) presence of groundwater; c) separation between sewage disposal saturation areas and groundwater; d) borings shall be as deep as necessary below the proposed on-site disposal area to assure required separation. The applicant must perform a minimum of three (3) percolation test holes, to be spaced uniformly in the area of the proposed sewage disposal system. (Parcel(s) _____, only).
- ☐ A community septic system shall be installed with a centralized leaching area and shall have a 100% or greater additional expansion area. The area for the community septic tank system and disposal area shall **be granted in fee on the map to the appropriate maintenance agency for maintenance with the right of ingress and egress / shall be kept as open space within easement for sewage treatment purposes granted to a homeowner's association.** Impervious paving over a disposal area is not considered acceptable.

- ☐ The applicant shall apply to the Department of Planning and Building for approval of new street names prior to the filing of the final parcel or tract map. Approved street names shall be shown on the final parcel or tract map.

Vector Control and Solid Waste

- ☐ A determination of method of pick-up shall be specified by the waste handler and if centralized facilities for the pick-up are required, provisions shall be made within the project for central facilities that meet **Land Use Ordinance / Coastal Zone Land Use Ordinance** requirements for trash enclosures. If centralized facilities are established, this shall include provisions for recycling if service is available or subsequent installation of such facilities if recycling service becomes available in the future.

Fire Protection

- ☐ Provide minimum fire flow of _____ gallons per minute as per nationally recognized standard. Fire flows to be maintained for a minimum two-hour duration.
- ☐ The applicant shall obtain a fire safety clearance letter from the California Department of Forestry (CDF)/County Fire Department establishing fire safety requirements prior to filing the final parcel or tract map.
- ☐ Designate a fire lane within all the driveway areas. This lane to be minimum width of twenty (20) feet. *(USE FOR MULTI-FAMILY/COMMERCIAL PROJECTS ONLY)*

Parks and Recreation (Quimby) Fees

- ☐ Unless exempted by Chapter 21.09 of the county Real Property Division Ordinance or California Government Code section 66477, prior to filing of the final parcel or tract map, the applicant shall pay the in-lieu" fee that will be used for community park and recreational purposes as required by Chapter 21.09. The fee shall be based on the total **number of new parcels or remainder parcels shown on the map that do not already have legal residential units on them / or the number of dwelling units proposed in the case of a condominium, stock cooperative, or community apartment project.**
- ☐ For subdivisions of less than five parcels that are not to be used for residential purposes, if a building permit is requested for construction of a residential structure or structures on one or more of the parcels created by this subdivision within four years of recordation of the map, the Quimby Ordinance fee specified in the county fee schedule shall be paid by the owner of each parcel as a condition for the issuance of such permit.

Affordable Housing Fee

- ☐ Prior to filing the final parcel or tract map, the applicant shall pay an affordable housing in-lieu fee of 3.5 percent of the adopted public facility fee effective at the time of recording for each residential lot. This fee shall not be applicable to any official recognized affordable housing included within the residential project.

- d. Designated building sites (and access drives) shall be shown on the additional map sheet reflecting the approved tentative map. **At the time of application for construction permits**, the applicant shall clearly delineate the approved building site and access drive on the project plans. 8-23
- e. Notification to prospective buyers of the county's Right to Farm Ordinance currently in effect at any time said deed(s) are recorded.
- f. Notification of the consequences of existing and potential intensive agricultural operations on adjacent parcels including but not limited to noise, dust, odor and agricultural chemicals.
- g. An agricultural buffer prohibiting residential structures, consisting of _____ feet over lots _____, shall be shown on the additional map sheet. This buffer shall become null and void on individual parcels within this subdivision, if the adjacent Agriculture land use category is changed or if any existing commercial agricultural business on adjacent parcels effecting this subdivision cease operation for a minimum of one year. **At the time of application for construction permits**, the applicant shall clearly delineate the agricultural buffer on the project plans.
- h. The limits of inundation from a 100 year storm over lots 2 from Willow Creek **creek / river** shall be shown on the additional map and note the required building restriction in the on the sheet.
- i. If improvements are bonded for, all public improvements (roads, drainage, and utilities) shall be completed prior to occupancy of any new structure.
- j. A notice that no construction permits will be given a final inspection until the fire safety conditions established in the letter dated _____ from the California Department of Forestry (CDF)/County Fire Department are completed. **Prior to occupancy or final inspection**, which ever occurs first, the applicant shall obtain final inspection approval of all required fire/life safety measures.
- k. Note to potential buyers and future owners of the property that the project is in an area from which combustion and petroleum-type odor complaints are frequently received by the Air Pollution Control District. The District Hearing Board has issued a nuisance abatement order which should improve the air quality in the Nipomo area; however, clean up is a lengthy process, therefore buyers of new lots should be advised that these conditions exist. *(ONLY USE IF WITHIN SOUTH COUNTY PLANNING AREA OR NEAR THE PLANT IN THE SAN LUIS BAY PLANNING AREA)*
- l. In the event archaeological resources are unearthed or discovered during any construction activities, the following standards apply:
- A. Construction activities shall cease, and the Environmental Coordinator and Planning Department shall be notified so that the extent and location of discovered materials may be recorded by a qualified archaeologist, and disposition of artifacts may be accomplished in accordance with state and federal law.
- B. In the event archaeological resources are found to include human remains, or in any other case where human remains are discovered during construction, the County Coroner is to be notified in addition to the Planning Department and Environmental Coordinator so that proper disposition may be accomplished.
- m. PUT ANY MITIGATIONS FROM DEVELOPER'S STATEMENT HERE **ONLY IF THEY GO BEYOND RECORDATION OF THE MAP** _____

Miscellaneous

8-24

This subdivision is also subject to the standard conditions of approval for all subdivisions using **community water and sewer / community water and septic tanks / individual wells and septic tanks**, a copy of which is attached hereto and incorporated by reference herein as though set forth in full.

- ☐ A stormwater pollution plan may be necessary from the Regional Water Quality Control Board. Provide evidence that it has been obtained or is unnecessary prior to filing the map.
- ☐ Applicant shall file with the Department of Public Works an application requesting apportionment of any unpaid assessments under the Improvement Bond Act of 1915, in compliance with Section 8740.1 of the Streets and Highways Code of the State of California. Said apportionment must be completed prior to filing the map.
- ☐ Prior to the sale of the designated remainder or omitted parcel, if applicable, the applicant shall obtain approval of a certificate of compliance or conditional certificate of compliance from the county.
- ☐ All timeframes on approved tentative maps for filing of final parcel or tract maps are measured from the date the Review Authority approves the tentative map, not from any date of possible reconsideration action.
